PRODUCT DATA

GE - GYM EQUIPMENT LUBRICANT

DESCRIPTION

- Herschell Gym equipment lubricant is a translucent white grease in aerosol spray form. This product is engineered with a highly specialised base oil that exhibits similar good lubricity characteristic as mineral oils with the non-toxic, non-ageing/oxidising, clean and long-lasting properties of silicone oils. The product was engineered as a multi-purpose lubricant for the assembly and maintenance of for all weight machines, treadmills, indoor bikes, row machines and step machines and is suitable for use on anti-friction bearings too. The lubricant has excellent water resistance properties which is an added benefit with routine machine cleaning and never leaves a sticky residue which mineral oil-based products are known for.

BENEFITS

- Unlike mineral oil lubricants this product is 100% plastic and rubber compatible
- Prevents stick slipping of treadmill belts on treadmill platforms.
- Does not contribute to rust formation on surfaces
- Long lasting lubricity and never oxidises
- Unlike oils this product stays in place, doesn't drip off and is mess free
- Excellent water and sweat resistance
- Non-toxic, clean, and safe on skin
- Wide service temperature range (-50°C to +200°C)

APPLICATION

- Sprayed directly between treadmill belt and onto wooden, steel or composite platforms this lubricant will ensure long-lasting, smooth non-slipping/sticking performance.
- Applied or sprayed onto plastic and metal pulleys this lubricant will remain in place and not polymerise plastic cable sheaths.
- Sprayed onto weight pins this lubricant will ensure long lasting easy of use whilst not promoting the formation of rust as is often the case with other lubricants.
- This lubricant to be sprayed directly onto any electronic or mechanical gym equipment mechanicals that contains plain or ball bearings, chains, splines, rachets, wire-ropes, threads, or keyways.
